

## 20W DALI-2 'Dim to Dark' LED Driver

### SOLOdrive

SOLOdrive offers industry-best Natural Dimming to dark - LED dimming made beautiful! With any dimmer, in any application. Symbiosis on SOLOdrive stands for unity, for the SOLOdrive working seamlessly together with LED modules, controls and intelligent luminaire elements.

### Product offering

### SOLOdrive 20MA-E1Z0D

Part number (P/N)	SL20MA-E1Z0D2
Product description	SOLOdrive, 20W, DALI-2, Pulse dimming, 1 control channel, constant current, 1x 40V output, side feed, long plastic

### Features & benefits

Natural dimming	Dim to dark, smooth brightness changes, excellent flicker performance, adaptable dimming curves, configurable minimum dimming level
Ceiling cut-out requirements	LED driver fits through ceiling cut-out diameter of 45mm for recessed downlight luminaires
LEDcode	LEDcode2 connects to integrated digital accessories, supports location-based IoT applications and enables wired and wireless lighting control through LEDcode peripheral devices
Programmable	Fine-tune your driver for any application
Performance	Low inrush current and total harmonic distortion (THD), high power factor and efficiency
Camera compatibility	Hybrid HydraDrive technology is proven to work in TV studios and security camera environments
Pulse dimming	Different switching and dimming functions are initiated by pressing and holding the standard mains voltage switch for varying lengths of time

**Programming tools**

Programming interface	<a href="#">TOOLbox pro (TLU20504)</a>
Programming cable set	<a href="#">TOOLbox pro to LED driver, programming cable, 5pcs (TLC03051)</a>
Programming Hand-held, Touch-and-Go	<a href="#">PJ0035HH1</a>
Programming jig	<a href="#">PJ0200A1</a>
Programming software	<a href="#">FluxTool</a>

**Warranty**

Warranty period	<a href="#">General Terms and Conditions</a>
-----------------	--

**Order number configurator**

P/N	LED driver part number
LED output current	Enter value in 1mA increments, e.g. "811" for 811mA
Dimming curve	"LOG" for logarithmic (default) "LIN" for linear
Minimum dimming level	Leave blank for default minimum dimming level of 0.1%. Specify in 0.1% increments, e.g. "10.5" for 10.5%.

---

**Input characteristics**

---

Nominal input voltage range AC	220 - 240V (ENEC)
Absolute input voltage range AC	198 - 264V
Nominal input voltage range DC	176 - 250V
Maximum input current AC	0.15A @ 230V
Input frequency range	50 - 60Hz
Efficiency at full load	80%
Power factor at full load	> 0.95
THD at full load	< 20%
Maximum inrush current AC	< 200mA <sup>2</sup> s @ 230V
Surge protection	2kV differential mode (DM) 2kV common mode (CM)
Maximum standby power	<0.5W

---

---

### Output characteristics

---

Maximum LED output power	20W
Number of LED outputs	1
Programmable LED output current range	150 - 1400mA
LED output type	Programmable in 1mA increments within specified current range
LED output current tolerance	+/- 5% at programmed LED output current
LED output voltage range	2 - 40V

---

### Operating window

**Control characteristics**

Control channels	1
Control protocol	LEDcode2 DALI-2 Device type 6 & Pulse dimming
Dimming range	100% - 0.1%
Dimming curve options	Logarithmic (default) Linear
Dimming method	Hybrid HydraDrive
Time delay to standby	<60s

Dimming curves

**Pulse dimming control**

End-user functionality & Installation requirements	Detailed explanation in the eldoLED Quick Start Guide
LEDcode compatibility	In an installation using Pulse dimming, LEDcode functionality cannot be used with a Bluetooth radio, sensor, or other LEDcode devices
Supported input voltage range AC	100 – 250V

**Performance**

Typical efficiency vs load

Tested with a load of 12 LEDs in series, programmed for 500mA and at 25 °C ambient temperature. The measurements below 20W were performed by dimming the light output.

Typical power factor vs load

Tested with a load of 12 LEDs in series, programmed for 500mA and at 25 °C ambient temperature. The measurements below 20W were performed by dimming the light output.

Typical THD vs load

Tested with a load of 12 LEDs in series, programmed for 500mA and at 25 °C ambient temperature. The measurements below 20W were performed by dimming the light output.

Typical flicker performance

Typical flicker percent as a function of frequency, measured across the dimming range. The results are overlaid with the low-risk (yellow) and no observable effect (green) levels as defined in IEEE P1789.

**Environmental conditions**

Operating ambient temperature ( $T_a$ ) range -20 °C to +50 °C  
 for output current  $\leq 900\text{mA}$   
 -20 °C to +43 °C for output current  $>900\text{mA}$

Maximum operating case temperature ( $T_c \text{ max}$ ) 85 °C

Lifetime 50,000 hours at a maximum case temperature ( $T_c$ ) of 85 °C

TC point location

**LED driver protection**

Thermal	The LED output current is decreased whenever the internal LED driver temperature exceeds factory preset temperature. The LED output current is increased again once the internal LED driver temperature drops below this internal temperature threshold. If the internal LED driver temperature continues to increase, despite a decrease in output current, the LED driver will shut down.
LED output short circuit	The LED output current is cut off whenever the LED driver detects a short-circuit. The LED driver will attempt a restart every 400ms after a short-circuit is detected.
LED output overload	The LED driver decreases the LED output current sequentially, until it reaches its maximum rated power, whenever a load that exceeds the LED driver's maximum rated power is connected to the LED output.
Reverse polarity	The LED driver will not yield any current if the polarity of the load on the LED output is reversed. This situation will not damage the LED driver but may damage the LED load.

**LED protection**

Thermal protection LED	An external NTC thermistor, which is placed on a PCB near the LEDs, can be connected to the driver via the LEDcode/NTC terminals. The output current to the LEDs is then decreased by 75% whenever the NTC exceeds a maximum allowable temperature, which is specified by the user in the FluxTool software. The default NTC temperature limit is set to 70 °C.
Thermistor value	47kΩ
Suitable thermistors	Leaded: Vishay, P/N 238164063473 Screw: Vishay, P/N NTCASCWE3473J

**LED driver mechanical details**

Length (L)	typical: 150.5 mm / 5.93 in
	maximum: 151 mm / 5.94 in

Width (W)	typical: 42.1 mm / 1.66 in
	maximum: 42.4 mm / 1.67 in

Height (H)	typical: 27.9 mm / 1.1 in
	maximum: 28.1 mm / 1.11 in

3D files available on product web page	IGS STEP
--	-------------

Weight	100 g
--------	-------

Mounting torque	Not to exceed 0.5Nm
-----------------	---------------------

**Packaging**

Length x Width x Height	579 x 237 x 202 mm / 22.8 x 9.33 x 7.95 in
-------------------------	--

Weight (including products)	10.5 kg
-----------------------------	---------

Products per box	50 pcs
------------------	--------

**Connector layout**

**Input wiring specifications**

Connector type	screw terminals
Connector supplier and series	TE-Connectivity 2-796683
Wire type	solid or stranded copper
Wire core cross section	0.5 - 3mm <sup>2</sup> / AWG 20 - 12
Wire strip length	9.0mm / 11/32"
Input-cable shape	Round

**Output wiring specifications**

Connector type	push-in terminals
Connector supplier and series	Wago 250 series
Wire type	solid or stranded copper
Wire core cross section	0.5 - 1.5mm <sup>2</sup> / AWG 20 – 16
Wire strip length	9.0mm / 11/32"
Output-cable shape	Round
Maximum remote mounting distance of LED load	For independent use: 2 m / 6.5 ft For in-fixture use: AWG 20 (0.52 mm <sup>2</sup> ) - 14 m / 46 ft AWG 19 (0.65 mm <sup>2</sup> ) - 18 m / 59 ft AWG 18 (0.82 mm <sup>2</sup> ) - 22 m / 72 ft AWG 17 (1.04 mm <sup>2</sup> ) - 28 m / 92 ft AWG 16 (1.31 mm <sup>2</sup> ) - 36 m / 118 ft

**Automatic circuit breakers (MCB)**

Maximum loading	MCB type	B10	B13	B16	C10	C13	C16
	Number of LED drivers	66	86	106	66	86	106

**Standards and compliance**

ENEC safety	EN 61347-1 EN 61347-2-13 (Emergency lighting)
ENEC performance	EN 62384
Conducted emissions	EN 55015
Radiated emissions	EN 55015
Radio disturbance characteristics	EN 55022
Harmonic current emissions	EN 61000-3-2
Electrostatic discharge	EN 61000-4-2
RFE field susceptibility	EN 61000-4-3
Electrical fast transient	EN 61000-4-4
Surge immunity	EN 61000-4-5
Conducted radio frequency	EN 61000-4-6
Voltage dips	EN 61000-4-11
Electromagnetic immunity	EN 61547
DALI-2	IEC 62386-101 Edition 2.0, IEC 62386-102 Edition 2.0, IEC 62386-207 Edition 1
Restriction of hazardous substances	RoHS3 (Directives 2011/65/EU-2015/863/EU)
SVHC-list substances	REACH Art.33

**Certifications**

---

## Safety

---

Risk of electrical shock. May result in serious injury or death. Disconnect power before servicing or installing.

The LED driver may only be connected and installed by a qualified electrician. All applicable regulations, legislation, and building codes must be observed. Incorrect installation of the LED driver can cause irreparable damage to the LED driver and the connected LEDs.

Pay attention when connecting the LEDs: polarity reversal results in no light output and often damages the LEDs.

LED drivers are designed and intended to operate LED loads only. Powering non-LED loads may push the LED driver outside its specified design limits and is, therefore, not covered by any warranty.

eldoLED products are designed to meet the performance specifications as outlined at certain operating conditions in the data sheet. It is the responsibility of the fixture manufacturer to test and validate the design and operation of the system under expected and potential use cases, including faults.

Please observe voltage drop over long cable lengths. Longer cable lengths increase EMI susceptibility.

Product renderings and dimensional drawings are generic for the housing type. Product label, connector type and quantity may vary.
